Apple OS

Q. How can I fix Adware and Malware issues?

1. If you have recurring pop-up windows or your browswer seems to have been hijacked, we recommend reading the excellent article 'How to fix adware problems on your mac' at the link below.

http://www.imore.com/how-fix-adware-problems-your-mac

2. Further and as mentioned in the artice above, we recommend the free application, AdwareMedic. Click the link below to go to the homepage and download the application:

http://www.adwaremedic.com/index.php

3. If this still does not fix your issues entirely and need a more thorough removal, follow the simple steps in the article at the link below:
